**The Amphora M L XL** vases are made from a double-dyed Kevlar fibre fabric. Distorting the weave gives the fabric an animal skin appearance.  
Design: Henny van Nistelrooy, [www.hennyvannistelrooy.com](http://www.hennyvannistelrooy.com)

**Treille**, is a system of cylindrical vases, horizontally aligned and connected by nylon belts and height-adjustable painted stainless steel tutors.  
Design: Ronan & Erwan Bouroullec

**Giant CurlyShade**, 60 metres of Cornish Ash secured around a frame by hand.  
Design: Sixixis  
[www.sixixis.com](http://www.sixixis.com)

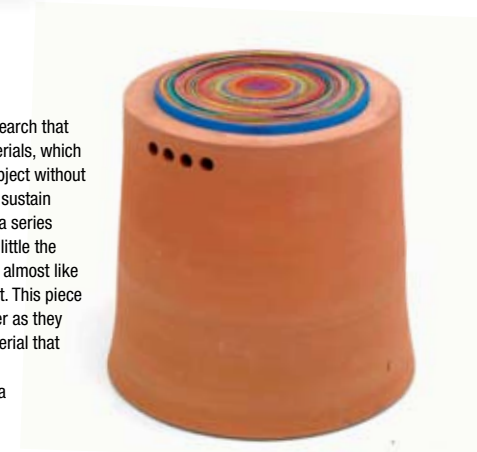

**Norwegian Forest**, these lights draw on a classic Scandinavian tradition of using thin birch strips for lighting.  
Design: Cathrine Kullberg

**Burst Chair**, designed by Oliver Tilbury  
[www.olivertilbury.com](http://www.olivertilbury.com)

**BB chair**, designed by Riccardo Blumer and Matteo Borghi  
[www.poliform.it](http://www.poliform.it)

**Terrastool**, this idea was born from a research that experimented with different kinds of materials, which were gathered together to construct an object without any structure, where the materials would sustain themselves. This investigation originated a series of chairs, the sushi chairs, where little by little the structure became more two-dimensional, almost like a painting, just as the cushion on this seat. This piece takes the Campanas work one step further as they have chosen to work with ceramic, a material that has rarely been used on their designs.  
Design: Fernando and Humberto Campana
